Hi Clare,

Sorry for the delayed reply. I'll try my best to fill the gaps below.

1. Upper Sustut Fence counts

- 2019 – 670
- 2020 – 233 – fence in operable for two week period in late Aug, due to damages sustained in summer flood event.
- 2021 – 135 – no interruptions in fence operation, flow conditions normal.
- 2022 – 181 – lowest flow conditions experienced at current fence site, resulting in possible impacts to migration and lower than average count.
